# 🌈 My Senses: Discovering the World Around Me!
## This Week: I Hear! 🐰

Our little explorers are discovering the wonderful world of sound! Over two weeks, we'll listen to birds singing, leaves rustling, footsteps tapping and the many interesting noises around us. Through music, movement, storytelling and playful sound experiments, we'll explore rhythm, volume, patterns and the difference between loud and soft.

From homemade instruments and animal sounds to listening games and musical adventures, our activities encourage language development, auditory awareness, creativity and social interaction. As always, children are free to explore at their own pace, with quieter alternatives for sensitive little ears.

After all, sometimes the most exciting discoveries happen when we stop, listen and wonder! 💚
